

The Complete Solution for Your Survey Needs

A complete solution engineered for accuracy and ease of use in challenging GNSS conditions, with advanced signal management and rugged durability.

TRIUMPH-1M Plus

The [TRIUMPH-1M Plus](#) is the next generation evolved from the market defining JAVAD TRIUMPH-1M Smart Antenna. With complete connectivity: UHF, Cellular, WiFi, Bluetooth are all built in with no external antennas needed.

TRIUMPH-3NR

The [T3-NR](#) is a small and light GNSS Network Rover with an integrated MEMS IMU designed for a full day of field work. Paired with JAVAD J-Mobile Android™ data collector, the T3-NR easily connects to Real Time Networks for corrections to get GNSS RTK results with IMU tilt compensation. With 25 hours run time on a single charge, the T3-NR provides all-day operation without needing a battery swap or recharge. All of this with a receiver that will fit into your shirt pocket.

TRIUMPH-LS Plus

The [TRIUMPH-LS Plus](#) is the ultimate receiver for accurate positioning with patented multi-engine RTK that delivers reliable and repeatable positions. The system automatically compares the results to converge on a solution of higher quality based on the best measurements. Be efficient and accurate in the most challenging GNSS conditions.

Field Survey Software

JAVAD [Field Survey software](#) is user-friendly and customizable to help you tackle any measurement task. Whether collecting, viewing, or sharing data, everything is done in one software with integrated use of images and shape files, DXF and precise KMLs.

Victor-2 & Victor-4

Connect your office to the field with JAVAD GNSS Field Computers. Designed for challenging conditions the [Victor-2](#) comes with an inbuilt keyboard and the [Victor-4](#) is an 8-inch tablet. Both solutions run the JAVAD J-Mobile for Android™ data collector optimized with user-friendly workflows and industry standard menu structures for immediate use with minimal training.
